

FITTINGS FOR TRAY

Flex divider

Create clearly defined storage locations in every tray with flex dividers, flexible tray organisation in seconds.

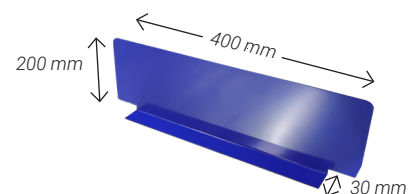

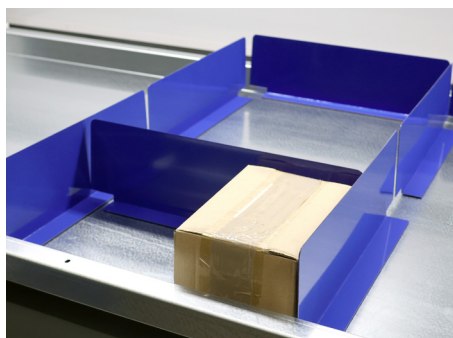

Flex dividers provide quick and easy tray organisation. Thanks to the magnetic base, they stay firmly in place while still being easy to move, adjust or remove without tools.

The 400 mm long divider is ideal for 820 mm deep trays, where two dividers fit perfectly. By overlapping the dividers, they can also be used in other tray depths, such as 610 mm.

Place the dividers close together for **small items** or with wider spacing for **larger goods**. The result is better organisation, more efficient picking and maximum use of every tray.

Some benefits

- Perfect for 820 mm deep trays, two dividers lengthwise.
- Stepless positioning, create compartments exactly as you need
- Also suitable for other tray depths – overlap placement
- Magnetic base, move, adjust and reconfigure without tools
- Flexible organisation for small and large items in the same tray
